EXECUTIVE SUMMARY

Senior engagement and delivery leader with 15+ years of experience in banking, insurance, and technology consulting across Publicis Sapient, ThoughtWorks, and Allianz. Managed several concurrent projects at Allianz and led consultant and delivery teams of 17–60 consultants across engagements, with experience spanning core banking modernisation, digital lending, cloud governance, and regional transformation. Combines senior stakeholder management, integrated planning, risk and dependency management, and cross-cultural team leadership with practical AI and machine learning portfolio work to translate complex business priorities into structured, governed delivery.

CORE SKILLS

Multi-Project & Programme Delivery	Banking & Insurance Transformation
Risk & Dependency Management	Client & Stakeholder Leadership
Team Leadership & Coaching	Agile & Modern Delivery
Cross-Cultural Collaboration	Cloud Governance & CCoE
AI Adoption & Delivery Governance	Data Flows & System Integration

CAREER HIGHLIGHTS

Core Banking Transformation & Integration

- Led multi-region modernization across 30+ components and 70+ team representatives, establishing ownership, integration cadences, and defect-resolution flows.

Cloud Migration & Governance

- Shaped CCoE and migration roadmaps through subsidiary portfolio analysis, readiness assumptions, and cloud consumption forecasts. Structured cloud delivery readiness across 130+ security and compliance controls.

Digital Lending & Customer Experience

- Led multi-team digital lending transformation and redesigned an auto-loan journey to reduce manual documentation and customer friction while improving approval readiness.

Cross-Border Program Leadership

- Directed digital insurance delivery across 8 APAC markets. Bridged China-Europe product, claims, and repair partners, resolving data handoff gaps and stabilizing the 11.11 AliExpress launch.

Technical Systems Foundation

- Built experience in Java/SQL test-data pipelines, ETL validation, COBOL/JCL batch analysis, and VSAM-to-DB2 migration testing.

SELECTED AI & TECHNOLOGY PORTFOLIO

AI Operating System

An independent human-in-the-loop portfolio experiment covering task intake and routing, role separation, quality gates, decision logs, telemetry, and evidence custody for AI-assisted work.

https://sararin.ai/ai-operating-system

Machine Learning & Decision Systems

Practical portfolio work exploring model evaluation and how analytical outputs support business decisions.

https://sararin.ai/machine-learning-decision-systems

Azure Databricks — NBO/NRT

Designed and governed a next-best-offer / recommendation experiment with offline policy evaluation, runtime controls, append-only evidence, and decision-ready reporting.

https://sararin.ai/case-studies/nbo-nrt-azure-databricks

Rain Chatbot

A LINE-based service used by local residents during flooding to understand location-relevant forecasts without interpreting weather maps themselves. The service has since closed as conditions eased and alternative services were available.

PROFESSIONAL EXPERIENCE

Publicis Sapient, Bangkok

Manager, Agile Program Management | Aug 2023 - Nov 2025

Digital Consulting / Financial Services

- Led core banking modernization across Thailand, China, India, and Europe, coordinating 30+ components across business, technology, vendor, and delivery workstreams.
- Established governance, ownership rules, integration cadences, dependency visibility, and escalation mechanisms; optimized defect triage across 70+ representatives.
- Analyzed subsidiary portfolios, infrastructure, compliance readiness, and cloud assumptions to shape CCoE governance, cloud adoption hypotheses, migration roadmaps, and consumption forecasts.
- Translated technical, regulatory, budget, and organizational constraints into executive-ready trade-offs; aligned cross-cultural teams through consistent decision rhythms.

ThoughtWorks, Bangkok

Executive Client Principal / Project Manager | Jul 2018 - Jan 2023

Global Digital Consultancy

- Led digital lending transformation across product, business, IT, security, and compliance;
- redesigned the auto-loan journey to reduce manual documentation and customer friction.
- Built and coached multidisciplinary squads on agile delivery, backlog quality, data-driven decisions, and delivery governance.
- Guided cloud-first pilot readiness across 130+ security and compliance controls; established reusable cloud delivery patterns later adopted by multiple bank programs.
- Balanced feature delivery, security obligations, regulatory expectations, and platform readiness in a regulated banking environment.

Allianz Partners, APAC

Senior Regional Project Manager | Jan 2017 - May 2018

Regional Digital Insurance

- Directed technology delivery across 8 APAC markets, aligning global solutions with local operational needs and market budgets.

- Bridged China-Europe customer journeys, regulations, and operational expectations, coordinating AliExpress product teams with European claims and repair partners.
- Resolved data validation and partner handoff gaps that blocked claim routing; stabilized the high-volume 11.11 AliExpress launch across multiple European partners.

DST Worldwide Services, Thailand

Senior Business Analyst / QA | Sep 2010 - Apr 2015

Financial Technology Delivery

- Analyzed COBOL, JCL, and batch-flow logic; traced transaction paths and batch trigger failures across front-end, batch, and data layers.
- Mapped dependencies for VSAM-to-DB2 migration and built reusable regression documentation, test designs, and knowledge-transfer materials for retirement-plan transactions.

IBM Solutions, Bangkok

Software Tester | May 2009 - Aug 2010

Technology Services / Core Banking Data Warehouse

- Worked on EDW testing, SQL validation, and large-scale test-data preparation using Java and data integration logic for core banking projects.

EDUCATION

Mahidol University — B.A.Sc. Information Technology, Second Class Honors (2006–2009)

PROFESSIONAL CERTIFICATIONS & EXECUTIVE DEVELOPMENT

PROGRAM / DELIVERY GOVERNANCE	AI / EMERGING TECHNOLOGY
SAFe 6 Agilist (2023)	DeepLearning.AI — AI for Everyone (2025)
ICAgile Certified Professional (ICP, 2015)	Harvard D³ — Agentic AI Fundamentals (2025)
ICAgile Certified Professional-BVA — Business Value Analysis (2015)	Agentic AI Engineering — Udemy (2025)
Applying Kanban (2019)	Harvard D³ — GenAI + Strategy (2025) Harvard D³ — GenAI + Finance (2025) Harvard D³ — GenAI + DS Ops (2025)
Data Science with Python (2023) • Tableau Hands-On Training (2023) • Probability from the Ground Up (2023)	Harvard D³ — GenAI + R&D (2025) Harvard D³ — GenAI + HR (2025) Harvard D³ — GenAI + Marketing (2025)

SELECTED TECHNICAL & AI CAPABILITY

ENTERPRISE TECHNOLOGY	AI • DATA • AUTOMATION
Cloud Governance & CCoE — migration roadmaps, readiness, decision rights, architecture guardrails	**AI Governance & Human-in-the-Loop** — role separation, human gates, decision logs, quality gates, traceability
Core Banking & Integration — 30+ components, multi-region dependencies, integration risk, defect triage	**Azure Databricks & ML Decision Systems** — governed experimentation, evaluation, OPE thinking, decision-ready evidence
Data Engineering Foundation — SQL, ETL/data validation, Java pipeline logic, COBOL/JCL batch and transaction flow	**RAG / Knowledge Systems & AI-Assisted Workflow Design** — structured context, reusable knowledge, prompt and role design
Technical Program Leadership — security/compliance controls, operating-model design, executive trade-offs	**Practical Analytics** — Python analytics, model evaluation, responsible AI adoption, business impact
